DETAILED ACTION

ACKNOWLEDGMENT OF AMENDMENT, REMARKS, IDS AND STATUS OF THE CLAIMS

1. The amendment and remarks filed 6/7/04 and the information disclosure statement (IDS) and Form PTO-1449 filed 7/13/04 are acknowledged, entered and considered. In view of Applicant's request claims 1, 6, 7 and 9-12 have been amended. Claims 1-17 are now pending in the application. The rejections under 35 U.S.C. 112, second paragraph and 35 U.S.C. 103(a) for claims 1-14 are withdrawn in view of Applicant's response filed 6/7/04.

CLAIMS REJECTION-35 U.S.C. § 103(a)

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 1653

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hendrickson (Science, Vol. 254, pp. 51-58, 4 October 1991).

In regard to claims 15-17, the claims are in product-by-process format. The novelty and patentability of the claimed product is based on the claimed product and not on the recited process steps. Claims 15-17 recite (even as dependent on claim 1) no new novel properties based on the claim 1 recited processes. The cited reference teaches that the old product have been expected by one of ordinary skill in the art to have been incorporated or generate proteins with heavy atom amino acids such as selenomethionine. With respect to the percentages of heavy atom introduction, See e.g., Hendrickson et al provided by Applicant as (Exhibit B), at page 1670, right column, paragraph 1, teaches a protein containing at least 80% substitution or incorporation of a heavy amino acid such as selenomethionine. Thus, since claims 15-17 are in product-by-process format, and as such, it is the novelty and patentability of the instantly claimed product that need be established and not the recited process steps, *In re Brown*, 173 USPQ 685 (CCPA 1972); *In re Wertheim*, 191 USPQ (CCPA 1976). Further, the prior art described the product as old, *In re Best*, 195 USPQ 430, 433 (CCPA 1977); (See MPEP 706.03 [e]). Hence, the burden of proving that the process limitation makes a different product is shifted to Applicants. *In re Fitzgerald*, 205 USPQ 594.

ACTION IS FINAL

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
